

Can you guess which birds behave like this?

Who does a wiggly funny **dance** on the

ground?

Who comes zooming in to catch its prey,  
**talons first?**

Who can **hover** like a helicopter and **fly forwards and backwards?**

Who can walk **head-first down a tree trunk?**

Who flies high in the sky with very little wing flapping  
and holds its **wings in a shallow "V"?**

Speaking of a **"V"**, who flies high  
in the sky like this?

Who **runs along the ground** and  
**finds** its dinner like this!
